DEVICE MANAGEMENT PLATFORM FOR INTERNET OF THINGS (IOT) APPLICATION

Nazmi Febrian

Sr. IoT Engineer at Axiata Digital Labs

April 25th 2020

NAZMI FEBRIAN

Sr. IoT Engineer at **Axiata Digital Labs**

Past careers:

Research Fellow at **SEEI ITB**

Embedded Engineer at **QIMTronics** and **Bukalapak**

Firmware Engineer Lead at **Pernika**

Bachelor and Master Degree – Electrical Engineering – **ITB**

OUTLINE

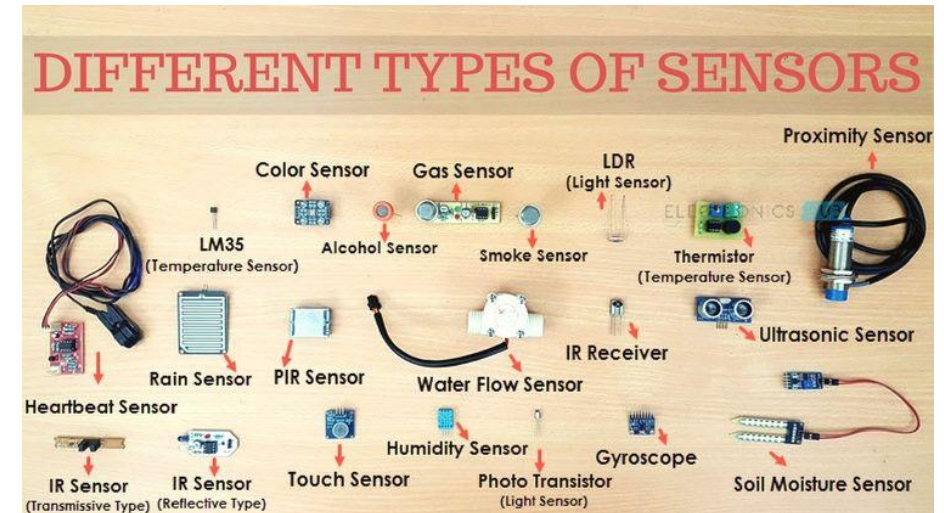

- IoT 101
 - IoT Introduction
 - IoT Sensor and Devices
 - IoT Network and Protocols
- IoT Architecture and Solutions
- IoT Real Case: Smart Building and Smart Farming
- Device Management Platform: FlexIoT
- Hands On Demo

IOT 101

- In 2009 for the first time, the number of “things” connected to the Internet surpassed the number of people
- More than 25 billion connected device in 2019, and 64 billion IoT devices by 2025
- IoT main aspects:
 - Sensors and Devices
 - Networks and Protocols
 - Big Data and Analytics
 - Cybersecurity and Privacy

IOT SENSOR AND DEVICES

- Popular embedded devices
 - 8-bit: ATmega328 (Arduino Nano and Uno)
 - 16-bit: MSP430
 - 32-Bit: STM32, ESP8266, ESP32, NRF, Renesas
 - 64-bit: Raspberry Pi 4
- Embedded Peripheral
 - USART
 - SPI
 - I2C
 - USB
 - Ethernet
 - etc

IOT SENSOR AND DEVICES

- **Buy existing devices**

- Less cost at initial
- Almost without development time
- Certification handled by manufacturer

- **Develop new device**

- More cost at initial
- Need development time
- Manage Lab Testing and Certification

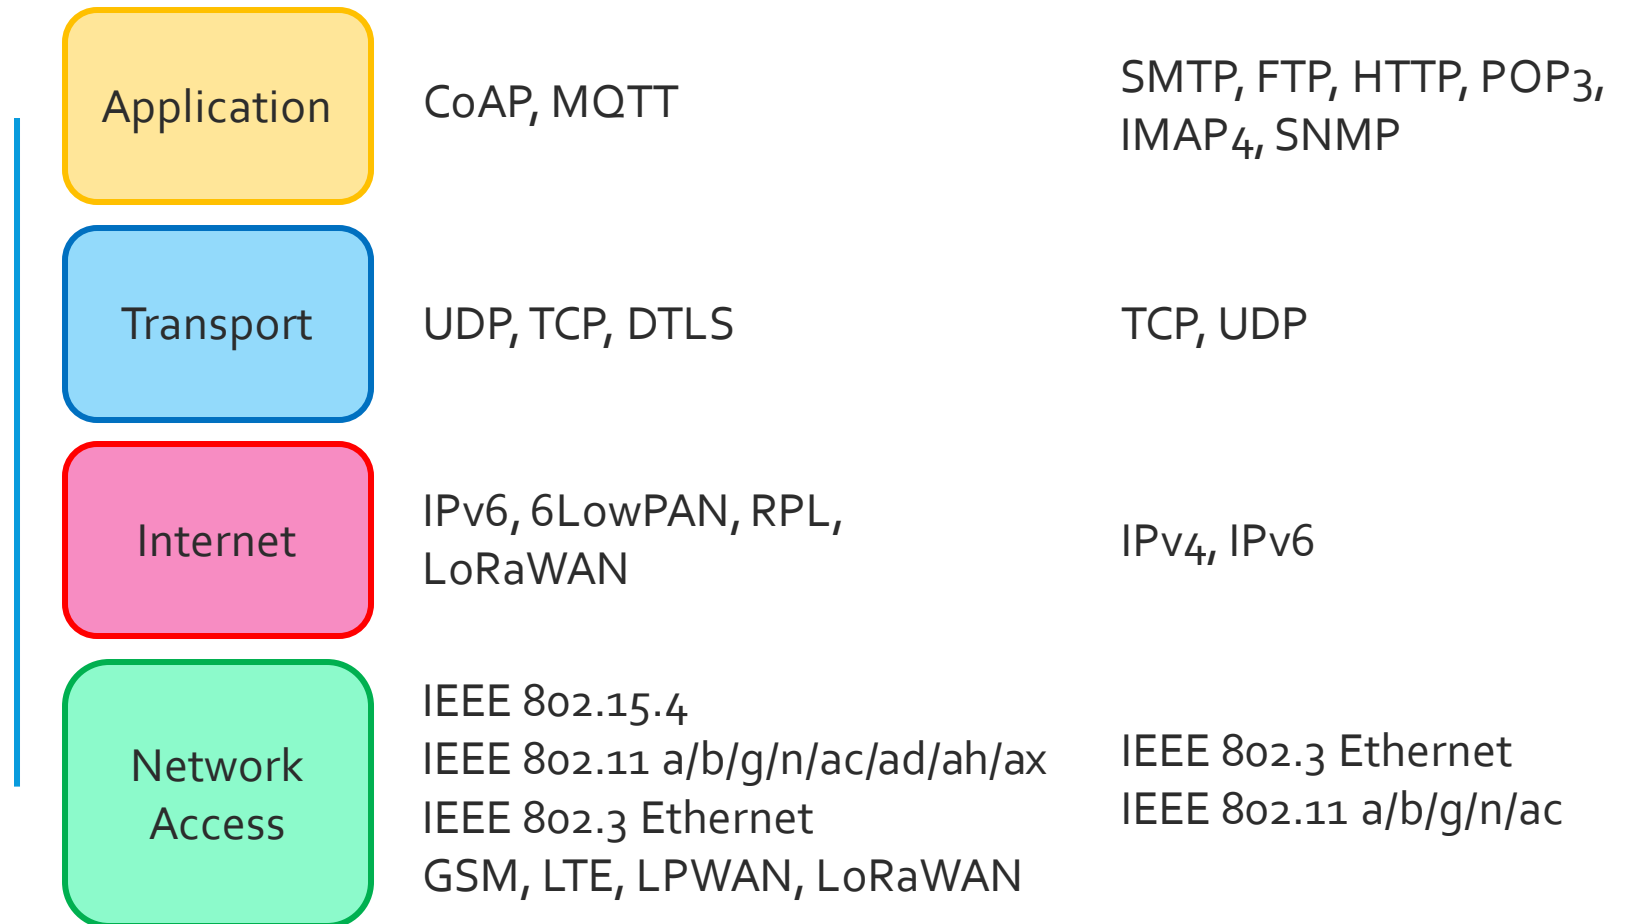

IOT NETWORKS AND PROTOCOL

Aspects to consider when choosing protocol:

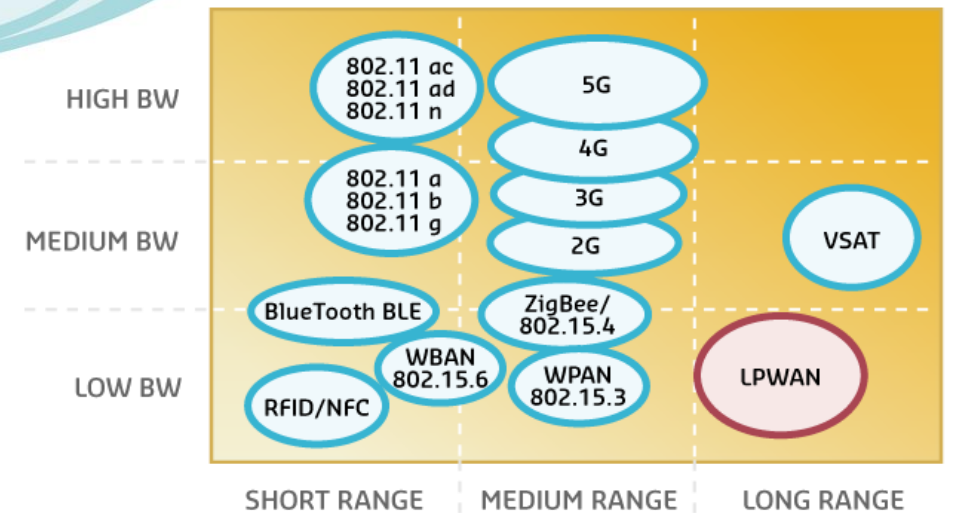

- Distance of connection
- Volume of data
- Speed and frequency

Layer	Example of IoT Protocols			
Application	MQTT	CoAP	AMQP	XMPP
Transport	TCP	UDP		
Internet	IPv6	RPL	6LowPAN	
Network Access and Physical	PAN: Bluetooth NFC	LAN: WiFi	WAN: LoRa, NB-IoT, Sigfox

DEVICE MANAGEMENT PLATFORM

VERTICAL SOLUTIONS VS PLATFORM PLAY

FLEX IOT

 IOT Developer Portal

Already have an account [Login](#)

Connect

Modular design for fast & scalable devices or any "thing" onboarding.

Build

Interfaces to enable collaboration between users, developers and iot service providers.

Manage

Manage a multi-sensory life style cutting across all domains.

Analyse

Real-time event stream processing & live feedback across domains to user's life style Services.

IMPLEMENTATION - SMART BUILDING

- Background
 - Environment issue
 - Energy efficiency -> Cost saving
- International Standard
 - LEED from USA
 - BREEAM from UK
- Smart Building Features:
 - Optimize HVAC System
 - Managed electricity reductions
 - Maximized building security
 - Smart sensor for lightning
 - Control appliances from remote locations

SMART BUILDING

The Edge – Amsterdam

- 98.3% BREEAM score
- Innovation: Smart LED by phillips

New Logic III - The Tube

- 99.4% BREEAM score
- Full solar cell at roof
- Produces more energy than consumes it

BUILDING MANAGEMENT SYSTEM

- Platform features
 - Entity, Building, Floor and User management
 - Alert via e-mail and SMS
 - Data history
 - Widget Management
- Sensor Features:
 - AQI index
 - Energy consumption monitoring
 - Light room control
 - HVAC monitor and control
 - Water tank monitor

SMART POULTRY

Issue: Ventilation, lighting, environmental, NH₃, CO₂, Manual measurement, late action, low food efficiency

Features:

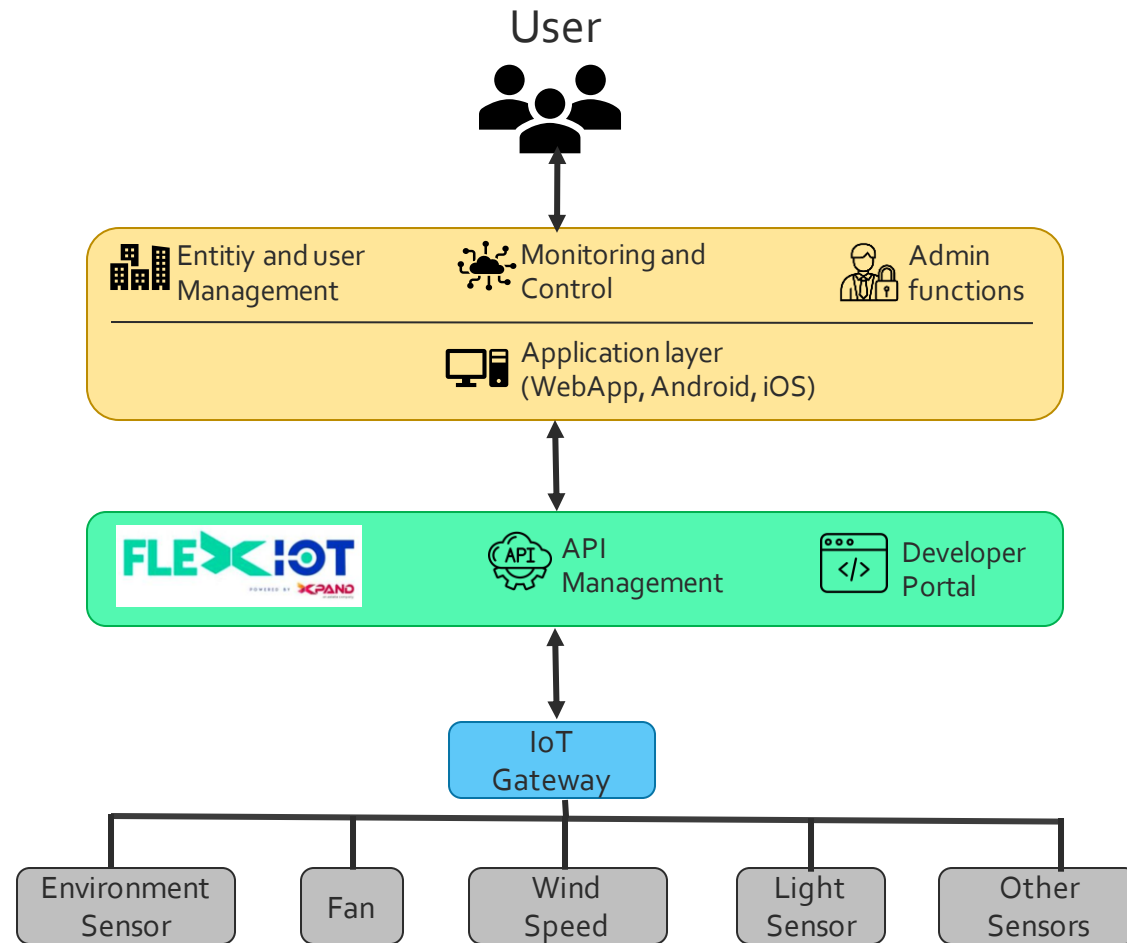

- Handle ~250000 chickens
- ~50 sensors
- Manage multiple farm and floor site in one platform
- Alert and notification system by threshold
- Historical data
- Monitor and control: water level, light intensity, air speed, fan, CO₂, population, FCR, Body weight, environment, NH₃
- Data analytics based on farming experiences

IOT SOLUTIONS - ARCHITECTURE

FLEX IOT DEMO

MODBUS PROTOCOL

- ~40 years old protocol
- Still popular in Industry and Automation
- Physical layer: RS385, RS232, Ethernet
- Master Slave communication
- Support up to 254 slave

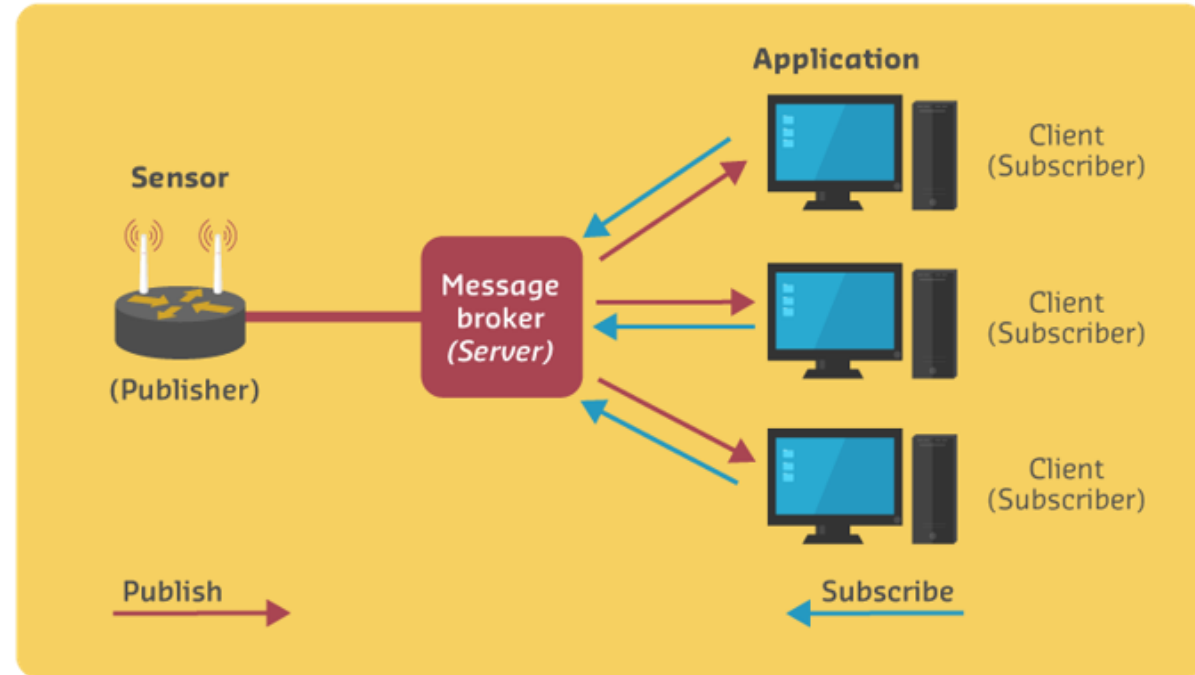

Register Type	Register Address	Register contents	Number of bytes
Input Register	0x0001	Temperature	2
	0x0002	Humidity	2
Keep Register	0x0101	Device Address	2
